

Dear Parents/Guardians of Sixth Grade Students:

In Grade 7, students will have two classes in their daily schedule for which they will be able to identify preferences, which will include the selection of a yearlong fine arts class. A more detailed description of the middle school program of study is attached.

This letter will help guide you and your child through the selection of a yearlong fine arts class and an additional elective class for the 2022-2023 school year. We encourage you and your child to have a conversation and make selections based on strengths and interests to ensure a successful transition to 7th grade. **Registration for these courses will be available online during the window of February 8, 2022 - February 22, 2022.**

Middle School Fine Arts Curricular Options (Students are required to take fine arts each year.)

Dance A: This course is designed to introduce students to a basic working knowledge of performance concepts that can be applied to all dance forms. Through collaborative experiences and the study of dance techniques students build confidence through creative movement, social/cultural dance, ballet, modern, jazz, choreography, and composition experiences. Students will learn and apply dance concepts and vocabulary through class discussions, performances, demonstrations, and self-reflections.

General Music I: General Music provides students with a deeper understanding of the language of music and how it relates to and impacts our lives and cultures through the study of four main strands: keyboard, guitar, world music drumming, and music technology.

Music Performance Ensemble: Ensemble options include **band, orchestra, or chorus**. Coursework focuses on individual instruments and vocal techniques in order to develop musical behaviors, creative thinking, and critical skills, both as individual musicians and in an ensemble setting. As in 6th grade, students who are enrolled in band or orchestra will participate in music sectionals on a rotating schedule and after school performances as part of the class requirements.

Theatre Arts A: This course is designed to introduce students to theatrical performance and the process of production. Through collaborative experiences and the study of acting techniques students build confidence, stimulate imagination, and role-play with an emphasis on believability and sensory awareness. Students will learn and apply theatre concepts and vocabulary in class discussions, performances, journal writing, and self-reflections.

Visual Arts Studio A: This course is designed to develop visual arts skills, knowledge, and understanding of the historical and contemporary visual arts worlds. Through the production and in-depth analysis of artwork, students make personal discoveries that inform and guide their practice, strengthen visual memory, and encourage experimentation, imagination, perseverance, and risk taking. Experiences will include developing and strengthening observational drawing skills, using color and value to create the illusion of form, relief printmaking, using additive and subtractive techniques to construct sculpture or craft forms, and the exploration of alternative and media arts.

Additional Middle School Curricular Options

World Language Program (*French, Spanish, Chinese*): Students who take World Language courses in middle school are able to pursue higher levels of World Language study (such as Advanced Placement-level language and culture courses) and the Maryland Seal of Biliteracy in high school. Like required English, mathematics, science, and social studies courses, World Language courses are academically rigorous. Because of this, students will receive high school credit after successfully completing one year of the World Language Level 1 course in

either Grade 7 or Grade 8. Students who have successfully earned credit for Level 1 in Grade 7 may elect to take Level 2 in Grade 8 for additional high school credit. Students' final grade(s) for World Language course(s) taken in middle school will appear on their high school transcripts but will not be calculated in the high school GPA.

Exploring Computer Science: This course will give students the opportunity to delve into real-world, relevant computing problems while gaining foundational computer science knowledge. Students will engage in several in-depth projects to demonstrate the real-world applications of computing. Topics include problem solving and computing as well as the design process. Students' final grade(s) for high school technology education course(s) taken in middle school will appear on their high school transcripts but will not be calculated in the high school GPA.

Foundations of Technology: This course prepares students to understand and apply technological concepts and processes that are the cornerstone of the high school technology program. Students study the nature and technological issues of the designed world. Group and individual activities engage students in creating ideas, developing innovations, design, fabricating and engineering practical solutions. Technology content, resources, laboratory activities and classroom activities allow students to apply science, mathematics, and other school subjects in authentic situations. Students' final grade(s) for high school technology education course(s) taken in middle school will appear on their high school transcripts but will not be calculated in the high school GPA.

Readers & Writers Workshop: This course assists students in developing a critical eye of their writing and engage in thoughtful discourse about texts. Students will then create their own responses that mirror the mentor text and demonstrate mastery of the writing skills that were analyzed. Using a workshop approach, students will be reading and writing daily so that final products can be constructed and polished throughout the course.

Registration

School staff will make every effort to schedule students for their top choices to the greatest extent possible. During the course selection process, parents will choose **two Selected Course Requests**. One of these course requests must meet the fine arts requirements (Band, Chorus, Orchestra, General Music, Theatre, or Visual Arts Studio). Next, choose **two Selected Alternate Course Requests** in priority order. We are asking for alternate course selections in the event of a scheduling conflict. Note that these are course requests and placement is not guaranteed. Students who are scheduled for an intervention may have fewer options regarding participation. Additionally, particular courses may not be offered if enough interest is not shown through course selection.

To register for courses, parents must register online in HCPSS Connect. Directions for registering online are linked below or can be found at <https://www.hcpss.org/connect/guides/>. Included on this page is step-by-step video directions.

[Online Course Requests – Rising 6th to 8th Grade Students](#)

For questions regarding scheduling, please contact Ms. OliverMcCain, 6th/7th grade counselor bettina_olivermccain@hcpss.org, or Ms. Julie Fischer, 7th/8th grade counselor, at julie_fischer@hcpss.org, or at 410-313-7635

Sincerely,

Melissa Shindel
Principal

Middle School Schedule in Detail

- The middle school schedule consists of seven periods. All students receive daily instruction aligned to Maryland’s College and Career-Ready Standards in English, mathematics, science, and social studies.
- Maryland regulations require:
 - All students take Health Education, Physical Education, and a Fine Arts course every year.
 - Students to take the following content one time during middle school:
 - Technology (Grade 6)
 - Financial Literacy (Grade 7)
 - Careers (Grade 8)
- The Grade 7 Schedule at a Glance consists of the following:

Course 1	English Language Arts
Course 2	Mathematics
Course 3	Science
Course 4	Social Studies
Course 5	Physical Education / Health / CTE Financial Literacy
Course 6	Fine Arts - Band - Chorus - Dance A - General Music I - Orchestra - Theatre Arts A - Visual Arts Studio A
Course 7	Elective Class - Chinese I - French I - Spanish I - Exploring Computer Science - Foundations of Technology - Readers & Writers Workshop - Additional Fine Arts class
